Copyright(c) 2002 Natural Solutions Environmental, Inc.

Distilled water is one of the purest forms of water you can have for yourself, your friends and your family! This unit will automatically shut off when water distilling cycle is complete and it's European -style design compliments any countertop area!

For only pennies per gallon, you can distill your water for drinking, tea, juices, cooking, coffee, soups, ice cube, etc.. Distilled water is also great for use in preparing fruits, vegetables, babies's formula and organic foods!

Comes Complete with 1 Gallon Serving Container that is PERFECT for storing and serving water!

Why have your own Countertop Water Distiller?

- It is **MORE** convenient and produces water which is less expensive per gallon than bottled water!
- **NO** plumbing is required! - Just plug it in to any 120 VAC!
- Water distillation is the best you can get in water purification and the closest to real H2O!!
- Water distillation is consistent over RO or other filter type systems for water purification!
- Water distillation removes and reduces more contaminants than any other form of water treatment systems!

Countertop Specifications:

Dimensions: 15"H x 15.5W" X 10.5D"
Produces: 1.0 US Gallon per 4 hours!
